PROJECTS

LEBATEAU.IO   2020 - 2021
 Demo

LeBateau is an online learning website which has been inspired from Le Wagon. The idea and path is the same as Le Wagon but different in programming language. We choose **JavaScript** over *Ruby*.

`ReactJS` `MaterialUI` `Javascript` `NodeJS` `ExpressJS`

TEAMMATES   2020 - 2021
 Demo

Teammates is a free online tool for managing peer evaluations and other feedback paths of your student. The original implementation uses Angular to provide user-interface, but I currently am developing the user interface via ReactJS as a side project.

`ReactJS` `MaterialUI` `Javascript` `Java` `Google App Engine` `Heroku`

PORTFOLIO   2013 - 2021
 Demo

My blog posts implemented in ReactJS and Material-UI then I used Next.JS and Tailwindcss to create the current version which has been deployed on Netlify and Heroku.

`NextJS` `Tailwindcss` `React Markdown` `React Icons` `Netlify` `Heroku`
